

Biolively, thanks to the use of natural active ingredients, offers cosmetic products that for their formulation can be used constantly over time.

The research is based on two key points: Effectiveness and Total Tolerance.

Which is why only components that are highly compatible with the body are employed. Components that we find in the food and food supplement sectors are employed to improve the effectiveness of the cosmetics.

Because "Beauty" is primarily expressed through physical wellbeing.

**The only way to regenerate
the skin
with Ascorbic Acid
is to use
Biolively Italia's
Natural Regenerating Gel.**

**Patented product
and certified by clinical tests.**

**Ascorbic Acid Protocol
Beauty and physical well-being**

Unique method

Cosmetics and supplements to normalize training of collagen making the skin more elastic and compact, visibly younger.

Natural gel

FACE REJUVENATING GEL
WITH HYALURONIC ACID
AND ASCORBIC ACID

Totally natural, innovative product, which combines the rejuvenating properties of Ascorbic Acid and the moisturizing action of Hyaluronic Acid, stimulates the synthesis of Collagen, attenuates wrinkles and keeps the skin of the face and neck toned and elastic, making it look younger.

The uniqueness of this product lies in the components of its formula, all of which are used in foods and food supplements.

No preservatives - Colourless - No added fragrances - Totally soluble in water - Suitable for daily use.

Activated by mixing the liquid and granular component, before use.

This product is ideal for:

Rejuvenating and moisturising the skin of the face and neck, thus slowing down skin ageing;

Stimulating the production of Collagen;

Making the colour of the skin uniform, reducing existing skin marks and successfully contrasting the formation of freckles;

Reducing any reddening of the skin due to exposure to the sun or low temperatures.

The Gel dries quickly, giving the skin a moisturized, silky and radiant look.

Application before bedtime is recommended.

Product Dermatologically Tested on sensitive skins.

INGREDIENTS INCI

Mixed product (BOTTLE + SACHET)

Aqua, Glycerin, Alcohol, Ascorbic Acid, Sodium Hyaluronate, Sodium Chloride.

Application before bedtime is recommended.

Product Dermatologically Tested on sensitive skins.

INGREDIENTS INCI

Mixed product (BOTTLE + SACHET)

Aqua, Glycerin, Alcohol, Ascorbic Acid, Sodium Chloride, Sodium Hyaluronate.

Go-Lively

FOOD SUPPLEMENT
with
MSM e L-Ascorbic Acid

The **Go-Lively** food supplement contributes to normal collagen formation for normal skin function.

It has been studied and created with the intention of supporting from the inside the action of skin regenerating cosmetics such as our **Regenerating Face and Body Gel**, to reduce muscle relaxation where cosmetics lose effectiveness because they merely have a surface action.

The MSM (Methylsulfonylmethane) as described by the "European Food Safety Authority" contributes to the normal formation of collagen, the normal maintenance of hair and nails, strengthens the function of the immune system, the normal maintenance of the Acid-Base balance, the maintenance of normal intestinal function, contributes to the normal synthesis of cysteine and the normal production of vitamins for the proper functioning of the metabolism.

The synergy between MSM (Methylsulfonylmethane) and Ascorbic Acid, helps to overcome mobility problems by limiting damage to cartilage, gives more dynamism and agility and helps the metabolism of collagen with benefits for the skin. Glucosamine, Taurine and Magnesium contribute to normal energy metabolism.

INGREDIENTS

MSM powder (Methylsulfonylmethane), Vitamin C (L-Ascorbic acid, Ethylcellulose). Bulking agents: Dibasic calcium phosphate, microcrystalline cellulose. Glucosamine vegetable hydrochloride, Taurine, Magnesium (Magnesium citrate). Anti-caking agents: Mono and diglycerides of fatty acids, silicon dioxide, vegetable magnesium stearate.

Coating: Hydroxypropyl methylcellulose, Titanium dioxide.
